

## Activity 10 - Rainforests

Year 1 and Year 2 children have been learning about the rainforests. In Year 1, children learnt about where rainforests are in the world and used a map to locate these. They also looked at the animals in these areas. Year 2 looked at the rainforests in more detail to have a better understanding of the habitat and climate. We had a good discussion about deforestation in the Amazon rainforests and how this was endangering animals in this habitat.
